SLITTING

## CUSTOMIZED SOLUTIONS

LABCOATING DESIGNS AND MANUFACTURES SMALL SCALE COATING, SLITTING AND PACKAGING SYSTEMS FOR AN ATTRACTIVE PRICE.

This portfolio consequently covers the complete machinery process for the development and for the production of transdermal systems (TTS/TDS) as well as of oral dissolvable films (ODF).

### COATING UNITS

Labcoating provides:

- different coating systems such as comma coating, knife over roll coating, multiroll coating
- modular coating heads for easy switching of coating methods
- drying systems, electrically heated with upper or lower air supply
- solvent- or waterbased
- minimum speed 0.1 m/min
- working width tailor-made
- with or without lamination

### SLITTING UNITS

Labcoating provides:

- table top slitting units
- max. diameter 300 mm
- web width 50 - 200 mm / 50 - 400 mm or tailor-made

## DEVELOPED FOR THE REQUIREMENTS OF THE PHARMACEUTICAL PRODUCTS!

LABCOATING PROVIDES CUSTOMIZED SOLUTIONS FOR THE COATING, SLITTING, AND PACKAGING EQUIPMENT.

- TAILORED TO YOUR NEEDS
- ALL UNITS FROM A SINGLE SOURCE
- UNIQUE, FLEXIBLE, PAYABLE

DEVELOP INDIVIDUAL SOLUTIONS

TEST IN PRACTICE

ENSURE QUALITY

LABCOATING OFFERS A TECHNICAL LAB FOR PRACTICAL TESTING OF COATING, SLITTING AND PACKAGING UNITS.

### PACKAGING UNITS (INTERMITTENT)

Labcoating provides:

- pattern and batch series production
- material width on demand
- punching, sealing, strip printing, packaging printing

Our engineers develop each machine individually according to customer requirements.
